

Take-off charges for GA flights 2020

From 2020, according to the Regulations relating to charges for use of airports operated by Avinor AS (charges regulation), charges for single take-off, weekly season card and yearly card will be determined as the product of the full take-off charge for commercial flights and factors provided in the charge's regulations.

The table below contains the factors used in calculation of charges for single take-off, weekly season card and yearly card, as well as the effective charges. Full take-off charge for commercial flights for 20120 is calculated on an average basis of 60 NOK per ton (MTOW) for 2 months and then 68 NOK per ton (MTOW) for 10 months. This is due to the re-introduction of a basic allowance of 6 MTOW on commercial flights from 01.03.2020 – the basic charge per ton will increase from the same date.
